Nexora Technologies

Company Information Handbook

Nexora Technologies is a software and cloud engineering company that builds digital platforms, data products, and AI-powered enterprise solutions. The company serves customers in financial services, retail, logistics, education, and technology.

Headquarters: Bengaluru, India

Founded: 2019

Employees: Approximately 420

Primary business: Cloud platforms, data engineering, AI systems, and enterprise software

1. Company Mission and Values

Nexora mission is to help organizations build reliable, secure, and useful digital products. The company emphasizes customer impact, engineering quality, responsible AI, continuous learning, clear communication, and operational ownership.

2. Departments

Department	Primary Responsibility
Engineering	Backend, frontend, platform engineering, reliability, and internal tools
AI & Data	Machine learning, LLM applications, analytics, data platforms, and evaluation
Product	Product strategy, research, requirements, and roadmap planning
Sales	Enterprise sales, partnerships, account growth, and customer relationships
Customer Success	Onboarding, support, adoption, and customer training
Finance & Operations	Budgeting, procurement, payroll, legal operations, and administration

3. Employee Leave Policy

Full-time employees receive **25 paid leave days per calendar year**. Employees joining after July 1 receive a prorated allocation. Up to 5 unused leave days may be carried into the following year.

Employees also receive **10 paid sick days** each year. Planned leave should normally be submitted through the HR portal at least 7 calendar days in advance and approved by the employee's direct manager.

4. Learning and Development

Engineering employees receive an annual learning budget of **$1,500**. AI and Data employees receive **$2,000**, while Sales employees receive **$700**. Approved expenses include courses, books, technical certifications, and professional conferences.

5. Remote Work Policy

Employees may work remotely up to **three days per week**. Teams may designate common office days for collaboration. Fully remote arrangements require approval from both the department head and Human Resources.

6. Home Internet and Equipment Benefits

All employees may expense up to **$50 per month** for work-related home internet. New full-time employees may request a one-time home-office equipment allowance of up to **$600**.

7. Engineering Reliability Standards

Nexora aims to keep P95 API latency below **250 milliseconds** during normal operating conditions. The monthly availability objective for customer-facing APIs is **99.95%**.

Production incidents are classified as SEV-1, SEV-2, or SEV-3. SEV-1 incidents require immediate notification of the on-call engineer and incident commander. The initial acknowledgement target is 5 minutes.

Error code **ERR_CONN_8421** indicates that the primary database connection pool is exhausted.

8. Cloud Cost Summary

Team	Q2 Cloud Cost
Platform	$120,000
Data	$82,000
AI	$145,000
Security	$64,000

The AI team recorded the highest Q2 cloud cost at **$145,000**, followed by the Platform team at $120,000.

9. Enterprise Customer Refund Policy

Enterprise subscription customers may request a refund for an accidental duplicate charge within **30 calendar days** of the invoice date. Approved refunds are normally returned to the original payment method within **5 to 7 business days**. Usage-based infrastructure charges already consumed are non-refundable except where required by law or explicitly approved by Finance.

10. Recent Checkout Platform Update

During the week of August 17, 2026, the Checkout team deployed payment-service release 4.8. The release added a new fraud-scoring call and changed the default database connection-pool configuration. Monitoring showed higher checkout latency after deployment. The team rolled back the connection-pool configuration on August 20, 2026. The incident review identified connection-pool contention as the primary cause of the slowdown.

11. Information Security

Employees must use company-approved devices for access to internal systems. Disk encryption is required, multi-factor authentication must be enabled, and restricted internal systems must be accessed through the corporate VPN. Executive compensation data is confidential. Engineering runbooks are restricted to authorized Engineering personnel.

12. Support and Escalation

Customer support tickets are categorized as Critical, High, Normal, or Low priority. Critical production-impacting issues should be acknowledged within 15 minutes. Normal support requests should receive an initial response within one business day.
